DETAILED ACTION

Election/Restrictions

Applicant's election of invention 1 is acknowledged. Claims 13-21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. The election is being treated being **without** traverse since Applicant did not point out any supposed errors in the requirement.

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not properly state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56.

Specifically, the language of the declaration should read: "I acknowledge the duty to disclose information which is material to patentability of this application in accordance with Title 37, Code of Federal Regulations Section 1.56." (The language should not read: "...material to *the* patentability...")

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 and 22-24 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kim (US 2003/0055430).

Kim discloses the claimed invention including a distractor assembly 30 comprising distracting arms 50A and 50B. Distractor fasteners 26 are rotatable relative to the arms (see, e.g., Figs. 4, 9b and 14). Any edge surface of the device can be a guide for an instrument and the fasteners perform a cutting action as they are threaded into bone.
